Inputs

Input	Value	Unit
-------	-------	------

Control records Rows: 0

Results

Result	Value	Unit
--------	-------	------

Total controls N/A rows

Present controls N/A rows

Missing controls N/A rows

Unknown controls N/A rows

Required missing controls N/A rows

Duplicate control IDs N/A rows

Control completeness N/A %

Topology comparison N/A

Formulas

present controls = count(rows with control status present)

missing controls = count(rows with control status missing)

control completeness = present controls / total controls x 100

topology status = entered complete only when missing, unknown, and duplicate counts are zero

Warnings and limitations

Gated topology worksheet only; it does not certify source isolation, transfer behavior, grounding, or field readiness.
