Inputs

Input	Value	Unit
Sequence steps	Rows: 0	

Results

Result	Value	Unit
Total steps	N/A	rows
Complete steps	N/A	rows
Missing steps	N/A	rows
Unknown steps	N/A	rows
Order errors	N/A	rows
Duplicate energy sources	N/A	rows
Sequence comparison	N/A	

Formulas

complete steps = count(rows with step status complete)

missing steps = count(rows with step status missing)

order errors = count(rows whose step order differs from row position)

sequence status = entered complete only when missing, unknown, order, and duplicate counts are zero

Warnings and limitations

Gated sequence worksheet only; it does not verify zero energy, isolation, absence of voltage, or completion of a field procedure.
